Support for bright students

Yale-NUS College students can apply for the college’s various scholarship schemes in a wide range of majors.

Cast a wide net when you apply for scholarships and don’t ever be too fearful of applying.

MEHAINLUI

Yale-NUS College

social sciences, humanities and the arts.

For now, the international Bancroftian diplomat holder has set his sights on specializing in life sciences, physical sciences and anthropology.

This is something that attracted him to the college.

He says: "As a person with an ambition for biology and music, it meant an opportunity to explore these interests, and Yale-NUS certainly provided it.

"Most importantly, the curriculum also encourages one to think and write critically. The survey of subject knowledge required for the skills required in today’s world.

"The scholarship helped me reduce the cost of my education considerably compared to the other options I considered.

"This enabled me to focus on my studies and other interests without having to worry about the cost of education.

As part of the inaugural cohort, he will be playing a part in shaping the four-year-old’s legacy.

As a young and rising college, everything from its curriculum is new and innovative. Yale-NUS is in the midst of the establishment of the university’s identity.

And he is excited that we create will eventually define Yale-NUS for years to come, understated to be part of it," he says.

He adds that on top of the university’s curriculum, the college’s Life Science Associate Program provides for a range of campus-faculty positions.

He has been involved in research projects in the life sciences, including his role in nematode worms — under the guidance of the researchers for the past eight months. Through this, he has gained valuable laboratory skills and applied his interests in biological research.

Well-rounded curriculum

Yale-NUS also offers opportunities for students to study arts and humanities.

Mr. Lui is fascinated by the range and scope of the modules offered that have campaigned, ranging from "Shakespeare, Aristotle and Nietzsche," all of which deal with directly related to his fields of interest.

"I had the opportunity to learn about everything from the life sciences, my planned and intended major. The curriculum has set those places in bold of me to begin to develop new interests in health, philosophy and literature.

"The diverse student background also kindled a culture of learning outside the classroom.

"While living in one of the Yale-NUS Residential Colleges, Mr. Lui is constantly surrounded by highly motivated peers who are always bringing up ideas and sharing their thoughts with each other.

"I am confident that the curriculum at Yale-NUS will prepare him well for the future.

"This strong foundation at Yale-NUS stockpiled the skills required in various careers, such as writing, creative thinking and analytical reading.

"As I am currently considering academic, scientific journalism or research in the pharmaceutical industry as possible career options, articles are particularly in-demand.

For potential applicants looking for a course of study and scholarships, he advises: "Cast a wide net when you apply for scholarships and don’t ever be too fearful of applying."
